

Marena NN

Maturity	:	medium late
cooking type (EAPR)	:	B, mainly firm cooking
resistance to nematodes	:	Ro 1 and Ro 4
resistance to potato wart disease (Synchytr.)	:	-
tuber shape	:	round-oval
eye depth	:	shallow
skin	:	smooth, yellow
flesh colour	:	creamy (light yellow)
yield	:	very high
calibration	:	mainly big tubers, regular
consumption quality	:	characteristic taste
discoloration after cooking	:	low
<u>resistances</u>		
Y-Virus (PVY)	:	very high
A-Virus (PVA)	:	very high
potato leaf roll virus (PLRV)	:	low
common scab (Streptomyces scabies)	:	medium
black leg (Erwinia spp.)	:	high
late blight (Phytophthora infestans)	:	high
internal rust spots	:	high
processing quality	:	French fries
sensitivity to mechanical damage	:	very low
dormancy	:	high (good storability)

MARENA is a high yielding variety in the early group of late maturing varieties

MARENA has a medium to high tuberisation rate and should be planted with 30-32 cm in a 75 cm row

MARENA request a reduced fertilisation with Nitrogen

MARENA has a smooth skin, regular shaped big tubers and good washing abilities, an ideal variety for prepackers.
